

**METHOD AND COMPUTER PROGRAM PRODUCT FOR  
ASSESSING A PROCESS OF AN ORGANIZATION**

**ABSTRACT OF THE DISCLOSURE**

A method for assessing a process of an organization is provided. First,  
5 information concerning the organization and the process is acquired, such as from a  
set of questionnaires, interviews and/or document reviews. Then, a plurality of  
preliminary findings are developed based upon the information. Each of the  
developed preliminary findings has an associated characterization of either a strength  
or a weakness. Next, a conclusion associated with each preliminary finding is voted  
10 for electronically, where the conclusion is either an agreement with the preliminary  
finding or a disagreement with the preliminary finding. A plurality of final findings  
are then developed based upon the vote for each conclusion. Each final finding also  
has a characterization of either a strength or a weakness.
